"Two million strong working to restore the voice of the American people on public policy decisions"

September 9, 2014

The Honorable Bill Cassidy

Dear Dr. Cassidy,

Please accept the gratitude of our 2 million supporters for your sponsorship of H.R. 3522, the Employee Health Care Act.

It is a sad day indeed when a sitting President deliberately and repeatedly deceives the American people in order to advance legislation. Yet, that is exactly what happened, by his own admission, when President Barack Obama repeatedly assured citizens that if they liked their health insurance—or doctors for that matter—they could keep their healthcare insurance.

We are in full support of the legislation you've introduced to protect citizens from being dropped from insurance coverage they do, indeed, prefer and which protects small business owners and employees, allowing them to choose "non-ACA-compliant" coverage. And, freeing citizens from "individual mandate" penalties could not be more important in our struggling economy. Thank you.

Your legislation goes far in restoring a measure of common sense and citizen choice and in making good the often repeated promise of President Obama. Thank you for introducing this legislation and for fighting for passage in the House. Please know that we are in full support of your efforts.
